Star Light did such a great job on the recessed lighting in our home that we had them come by and install our Tesla wall connector. They are professional, knowledgeable and a pleasure to work with. We will definitely use them for all of our electrical work. Thank you both!

Star Light Electric was excellent to work with from start to finish. They came to our home prior to providing an estimate in order to fully understand the scope of work required. They arrived on time and worked diligently on our project (wiring and installing 2 coach lights on either side of our garage and replacing to lighting units on either side of our front entrance door). Upon completion of the project they thoroughly cleaned up the work areas, installed the new light bulbs and tested all of the fixtures. We couldn't be happier with their work and will not hesitate to call on them for future projects!

The team at Starlight are exceptional. We had 20 lights and 4 ceiling fans installed. The removed track lighting and installed LED lighting in kitchen, living room and installed new fans in the bedrooms. High quality work very professional and committed to delivering as quoted.

I recently had a Tesla Wall Connector installed by Star Light in my detached garage in Phoenix. Michael and his father were a pleasure to work with— they came out to deliver a quote same-day and had me scheduled for installation a week later.

The job required 100ft of wire (60A/240V) pulled through an existing conduit in order to supply power to the Tesla Wall Connector. They did an excellent job and the Model 3 is getting its max 48A charge.

I highly recommend Star Light if you're looking for a friendly, knowledgeable electrician in the greater Phoenix area.

Father and son team that were recommended by a friend. Initially, they actually tried to walk me through a fix over the phone. When it was apparent that there was an issue that required repair, we made an appointment. They were communicative and on time. I found them to be honest and trustworthy. And the charges were extremely reasonable. I highly recommend these guys.

Starlight electric installed a 240 Volt 50 amp charging unit for my newly purchased hybrid car. I selected them based on all the great reviews from other customers, their years of residential/commercial experience as well as their specialization in the type of installation I needed to charge my Audi hybrid.

I love the fact that I can now charge my car in three hours instead of 24 hours! Electrical skill sets aside, I was equally impressed with their customer approach. Michael, one of the owners, came to our home and provided us with a quote, explained the pricing and scheduled our job.

On the day of the installation they called in the morning to let us know when they would arrive and were very professional, thorough and cleaned as they went along. Overall, working with them was a very good and non-stressful experience! I plan to use them again for other home projects and wanted to share my experience. I highly recommend Starlight electric - You'll be happy with the results!

Professional, on time, respectful, personable and true craftsmen. Everything was done better than promised - with better service than I've ever seen. I had 7 exterior lights installed with 4 programmable switches as well as a repair on an outside post light that shorted out during a storm. Everything is working perfectly. They cleaned up everything as they worked and treated my house and property with true respect. I usually dread having workmen around as I'm never sure if things will get done properly. The opposite with Starlight Electric. I enjoyed everything and can't stop admiring all my new lighting. It's perfect. They deserve 10 Stars. Truly an awesome experience.

Michael is amazing to work with. Super responsive and attentive. We had never hired an electrician before and he made it worthwhile. He was very quick and clean and honestly he just is an overall nice guy and fun to be around. Thanks for everything! Will definitely be calling them for our next project.

Excellent service and very well-priced. The repairs they did for me were thorough and quality checked before they left and the technician was very patient with me as I gave him my poorly-explained laundry list of concerns during our initial phone call. Will definitely recommend and will definitely call them for future repairs.
